

MINIGA SOMA SHEKAR

+91-9182102613 minigasomashekar@gmail.com Hyderabad, India

Career Objective

Aspiring software developer with hands-on experience in Python, C, and web technologies. Strong foundation in data structures and machine learning, backed by projects and internships. Eager to contribute to the full application development lifecycle and grow within a dynamic, collaborative tech environment.

Technical Skills

Languages: Python (Primary), C, JavaScript (Basics), HTML, CSS

OOP & CS: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Operating Systems

Machine Learning: Supervised Learning Basics, Face Recognition, Model Prototyping, scikit-learn

Web & Tools: Responsive Design, CSS Flexbox & Grid, Git, GitHub, VS Code, Canva, CapCut, Google Colab

Education

Malla Reddy Engineering College

B.Tech – Computer Science & Engineering | CGPA: 6.82/10

Hyderabad, India

2023 – 2027 (Expected)

Sri Chaitanya Junior College

Senior Secondary (XII) – Mathematics, Physics, Chemistry | Percentage: 90.2%

Hyderabad, India

Completed 2023

Presidency High School

Secondary School Certificate (SSC) | CGPA: 9.7/10

Hyderabad, India

Completed 2021

Trainings / Certifications

Python and Data Structures

TechAugust

Hyderabad, India

May 2024 – Jun 2024

- Completed intensive training on core Python programming including functions, modules, file handling, and exception management.
- Studied fundamental data structures – lists, stacks, queues, linked lists, and binary trees – with practical coding exercises.
- Solved algorithm challenges to strengthen logical thinking and time-complexity awareness in problem solving.

Projects

Smart Attendance System Using Face Recognition | Python, OpenCV, Machine Learning

Oct 2025

- Designed and built a fully automated desktop attendance system that identifies students in real-time using face recognition technology.
- Implemented the complete lifecycle: student registration with photo capture, model training, live detection, and report generation.
- Used OpenCV and ML classifiers to achieve accurate face detection and matching under varied lighting conditions.
- Built an intuitive GUI enabling non-technical users to manage attendance records and export daily/weekly reports seamlessly.

Additional Details

- Fast learner and highly adaptable to new technologies, tools, and team workflows.
- Strong problem-solving ability with a methodical approach to breaking down complex challenges into manageable solutions.
- Effective communicator who can clearly articulate technical concepts to both technical and non-technical stakeholders.
- Proactive team collaborator with experience in group projects, peer code reviews, and shared development environments.

Strengths & Languages

Strengths: Proactive Problem-Solver | Independent Learner | Team Collaborator | Effective Communicator | Adaptable

Languages: English – Professional Proficiency | Telugu – Native Proficiency
